Career Objective

Aspiring web developer with a strong skillset in HTML, CSS, JavaScript, Node and ReactJS seeking opportunities to learn and grow in web development. Being proficient in the MERN stack, I also have an independent business where I create and host custom websites with branding packages whilst implementing technical changes related to SEO for my clients. I'm an enthusiastic problem solver with a passion for UI/UX and very eager to contribute to innovative and professional projects.

Education

Bachelor of Software Engineering (*Honours*) & Diploma of Professional Engineering Practice
University of Technology Sydney   **Feb 2019-Jun 2025**

- Completed two internships at a total of 1440 hrs
- Course completed with distinction
- Engineering projects with an NGOs & Engineers Australia

Experience

Artization, Sydney   **Aug 2023-Present**

- Project manager, full stack web development & business decision making
- Figma UX/UI design, running weekly sprints whilst supervising two developers
- MongoDB, ExpressJS, ReactJS, NodeJS, TailwindCSS

Microsoft Product Advisor, Sydney   **Sep 2023–Present**

- As a Microsoft product advisor I leverage my in depth-knowledge of Microsoft's diverse product range to guide and supports customers in selecting the optimal solutions for their needs.
- Excellent customer service whilst articulating product features and benefits via communication and understanding technology trends.
- Combination of expertise, interpersonal skills and reporting on the required documentation and planning.

DigiGround Web Developer, North Sydney   **Feb 2023-Aug 2023**

- Quality assurance software testing, managing and creating bugs reports with regression testing.
- REACT JS framework Web Application development, includes UI design and frontend implementation.
- Constant growth and learning, embracing challenges to sharpen my web development skills.
- Search Engine Optimisation (SEO) for keywords, meta tags, descriptions and 88%+ page optimisation

APCD IT Technician, Sydney   **January 2021 – October 2023**

- Completed a solo Web App to manage inventory with HTML, CSS, JS, SQL, NodeJS & EXPRESS. This involved some management of the front-end & back-end. *See Relevant Projects Below* and at https://sauhardha.dev
- Primary position as a Testing/Troubleshooting technician involved diagnosing, troubleshooting & repairing a wide range of desktop and laptop hardware issues.
- Imaging network gear such as switches, servers & routers.
- Imaging desktops, Apple Mac/MacBook devices & notebooks for offices of assets belonging to major banks & other corporations.
